

Tailor-made perforated balustrades

Does your imagination have holes in it? Can you imagine the effect of a perforated balustrade, incorporated into your latest project? As Europe's largest manufacturer and supplier of perforated metal, RMIG can help you to realise your vision, without limits.

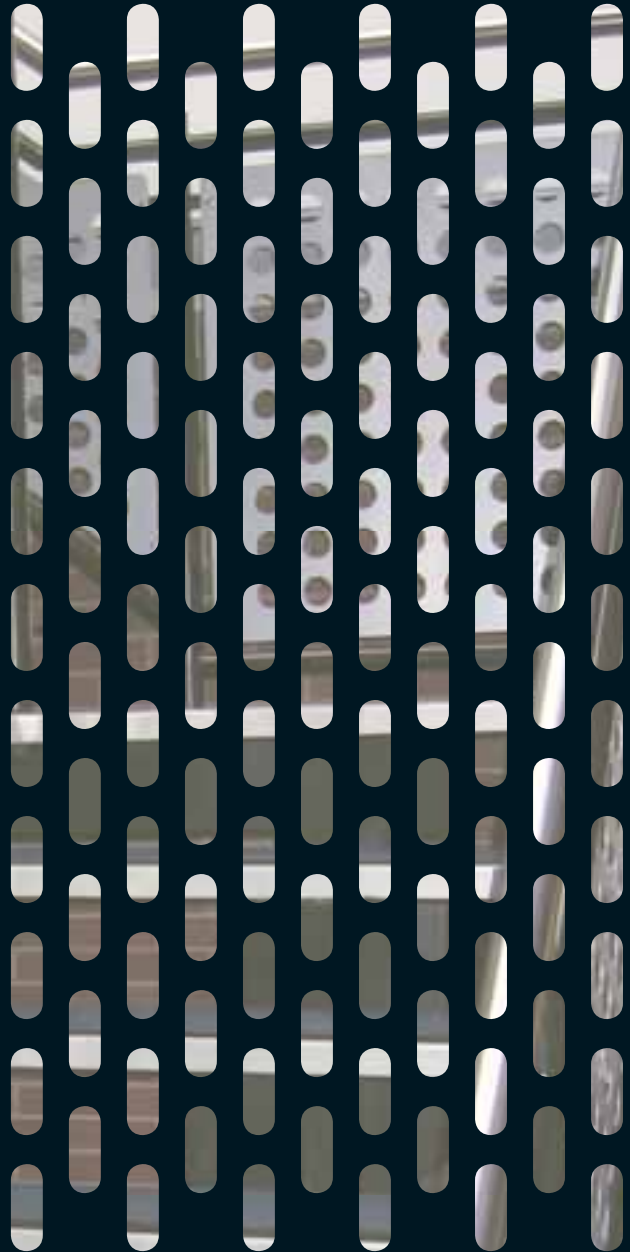

Your imagination is our only limitation

Pure fabrication

It's no lie to say that we offer a comprehensive perforation and fabrication service, pure and simple. Or pure and complex, if that's what you need. So as well as perforating to your design, we can provide bolt holes, bending and forming – whether using mild steel, aluminium or stainless steel. And what we've started we can finish for you: whether it's natural finishing, powder coating, galvanising, anodising, etc., whatever suits your needs.

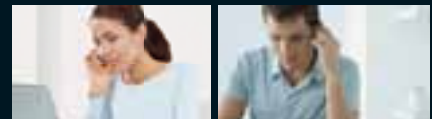

To discuss your ideas and our capabilities, please contact our dedicated architectural service team.
There's no limit to what we can do together. But first we have to get together. 01925 839610.

RMIG Ltd., Units 1-7 Adlington Court, Risley Road, Birchwood, Warrington, Cheshire WA3 6PL.

RMIG

We aim to help you form your ideas into stunning perforated metal.
Share your drawings with us and we'll share our thoughts with you.
Then, working together, we'll arrive at an effective solution that
demonstrates a successful partnership. Whether you're seeking stunning
appearance or function and durability, our products excel in all areas.

Form and function

From the start to the finish

At RMIG our talented engineers, specialist tooling and state of the art presses make concept to reality a quick and easy journey. Your bespoke solution is finished to whatever specification you require, and then inspected to ensure it meets the highest standards.

Approved to BS EN ISO 9001:2000
